INFO.

The following table gives the total volume of production of the VVB(Z) Mansfeld for 1950 and the planned production for 1951. Given also are the production costs for 1950 and the estimated costs for 1951. The 1951 costs are based on an estimated yield of 11.45 kilograms of copper per ton of ore. The production and cost figures for 1950 were estimated for the final six weeks of the year on the basis of the weekly averages for the year.

	1950	1951 Planned	Costs	Planned	
	Production	Production	1950	Costs 1951	
		ccept as noted)	1.000 Di	1,000 DM
